smart in media
intelligent software

SEND & VIEW SLIDES
ANYWHERE AT ANY TIME

The PathoZoom® Scan & Diagnostics Suite is your cost-efficient power package and the perfect solution for:

Frozen sections: Scan and send a whole slide in one minute to a colleague. With the easy-to-use annotations, you can highlight regions of interest.

Second opinion: Get a second opinion from a colleague quickly by using PathoZoom® Scan.

Teaching: Scanned slides can be integrated into our digital teaching platforms that are used world-wide!

Presentations: Show your digital slides at conferences and tumor boards.

The process is very simple:

1. SCAN with your own microscope (PathoZoom® Scan has no moving parts and is therefore a robust and very reliable system),

2. UPLOAD your slide into the PathoZoom® cloud and use a variety of digital tools, like adding annotations,

3. SHARE your slide with one click via e-mail or other channels through a simple link.
Your colleagues can open and view the slides and your annotations from anywhere and at any time!

FEATURES

✓ Annotate slides for teaching and education
✓ Scan images with immersion oil
✓ Scan two specimens in one image (e.g., different staining)
✓ Easy to install in a few minutes — no IT knowledge required
