LET THE ASSISTANT WORK FOR YOU

"I work continuously with the Diagnostic Assistant. It eases my daily workload by automatically detecting tumor cells in immunohistochemistry with high reliability."

Alberto Perez Bouza, M. D. // Pathologist

Currently, we offer quantifiers for Ki67 and ER/PR. More quantifiers as those for PD-L1 and Her2/neu will be released soon!

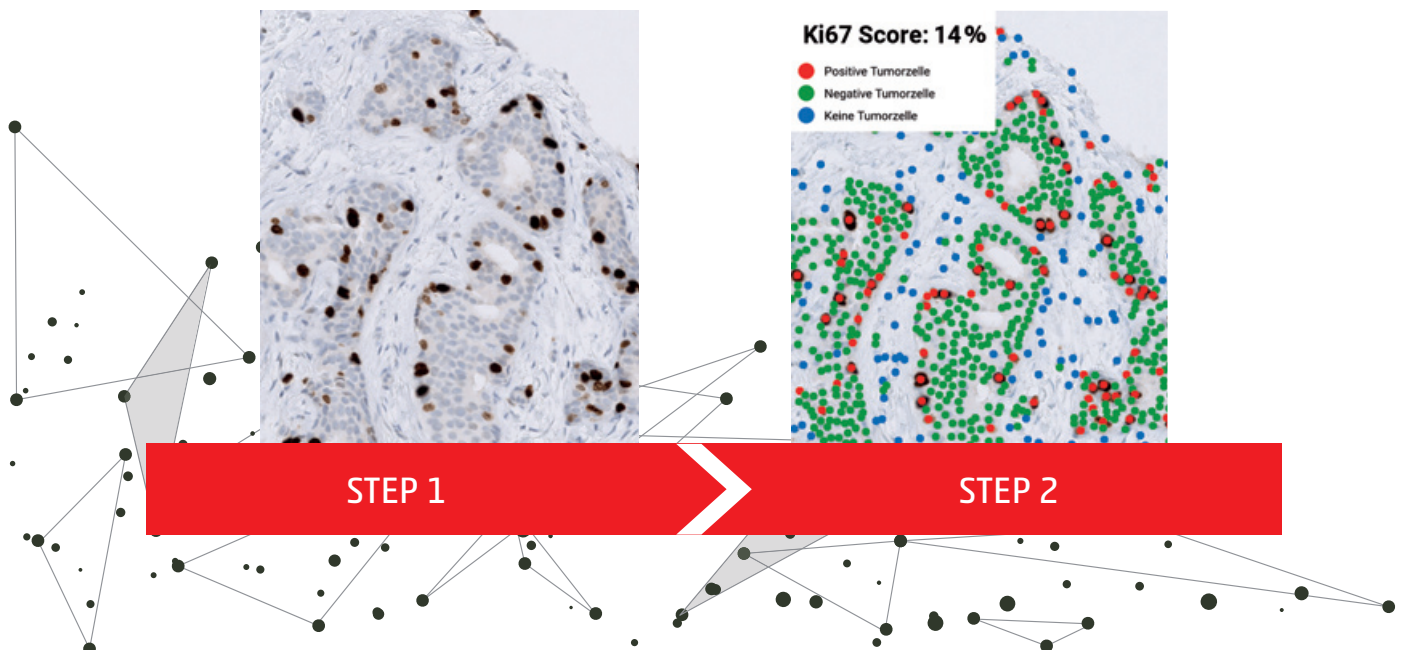

PathoZoom® Diagnostic Assistant will support and accelerate your work flow with reproducible results. While the Diagnostic Assistant works for you, you remain in the driver seat and can visually control the results.

The analysis takes less than five seconds*

... on your slide that you are microscoping with PathoZoom® LiveView,

... on your slide that has already been uploaded into your PathoZoom® SlideCloud account.
